To whom it may concern:

This is to serve as a letter of reference for RBA Management, LLC. During 2019, RBA completed projects in 3 school districts in Westchester County, NY for a defaulted General Contractor in receivership. The work they did to bring these projects to a completion was nothing short of amazing.

They hit the ground running in February in Harrison, NY and by May had completed a \$3 million classroom addition. Then they took over the completion of 2 STEAM center labs in Chappaqua in June and had them both substantially complete by October. Finally, they took over a completion project in Yonkers in October and had the majority of work complete by February 2020.

RBA used some existing subcontractors and brought other new subcontractors into the project. I am sure that without the expertise of RBA, these projects could have dragged on for years and the losses might have been several times what they ended up being.

I wholeheartedly recommend RBA as a Construction Manager, Surety Consultant or Completion Contractor. Their aggressive approach to project completion saved our company and our reinsurers several hundreds of thousands of dollars.

Please feel free to contact me for more information or for a personal recommendation.

Sincerely,

Philip S. Tobey
